### **INTRODUCTION**

These pages explain the purpose of this zoning by-law and how it should be used. These pages do not form part of the zoning by-law passed by Council and are intended only to make the zoning by-law more understandable and easier to reference.

### **PURPOSE OF THIS ZONING BY-LAW**

The purpose of this zoning by-law is to implement the policies of the St. Joseph Island Official Plan. The Official Plan contains general policies that affect the use of land throughout the Township. These policies specify where certain land uses are permitted and, in some instances, specify what regulations should apply to the development of certain lands.

The Official Plan is a general document that is not intended to regulate every aspect of the built-form on a private lot. In the Province of Ontario, this is the role of the zoning by-law. Once an Official Plan is in effect, any Zoning By-law passed by Council must conform to the Official Plan. For example, if the Official Plan stated that lands in the vicinity of a significant natural feature are to remain in their natural state, the zoning by-law would prohibit the erection of buildings or structures on those lands.

The Ontario Planning Act grants the statutory authority to Zone land. The Planning Act specifies what a by-law can regulate. A zoning by-law can:

- prohibit the use of land or buildings for any use that is not specifically permitted by the by-law;
- prohibit the erection or siting of buildings and structures on a lot except in locations permitted by the by-law;
- regulate the type of construction and the height, bulk, location, size, floor area, spacing, and use of buildings or structures;
- regulate the minimum frontage and depth of a parcel of land;
- regulate the proportion of a lot that any building or structure may occupy;
- regulate the minimum elevation of doors, windows or other openings in buildings or structures;
- require parking and loading facilities be provided and maintained for a purpose permitted by the by-law; and,
- prohibit the use of lands and the erection of buildings or structures on land that is:
  - subject to flooding;
  - the site of steep slopes;
  - rocky, low-lying, marshy or unstable;
  - contaminated;
  - a sensitive groundwater recharge area or head water area;
  - the location of a sensitive aquifer;

- a significant wildlife habitat area, wetland, woodland, ravine, valley or area of natural and scientific interest;
- a significant corridor or shoreline of a lake, river or stream; or,
- the site of a significant archaeological resource.

## **HOW TO USE THIS BY-LAW**

In order to reference this by-law most easily, a property owner should follow each of the steps listed below to determine what permissions apply to their particular property.

### **1. Locate the Property on a Map**

Maps in a zoning by-law are called ‘Schedules’. The first step to using this by-law is to refer to the Zone schedules that are contained at the back of the by-law to determine in which Zone category your property is located. The Zone category will be indicated on the schedules by a symbol or abbreviation. For example, you may see a symbol such as “R1” associated with your property. This would indicate that your property is within the ‘Residential One Zone’. The Zone symbols or abbreviations are explained in Section 2 of the by-law.

Section 2 also provides assistance to help you identify the Zone boundaries on the schedules. For example, if your property appears close to a Zone boundary and you are not sure how to determine exactly where that boundary is located, refer to Section 2.4 of the by-law.

### **2. By-law Amendments**

A zoning by-law is not a static document; it is amended over time as policies governing land use change. Before proceeding any further, you should verify that your property is not the subject of an earlier zoning by-law amendment. Some of these amendments are listed in Section 8 of this by-law. More recent amendments may not be included in the version of the by-law you are using. Staff will be able to assist you to confirm if your property has been subject to a more recent zoning by-law amendment.

### **3. Permitted Uses**

The next step to using this by-law is to determine what uses are permitted on your property. Section 6.0 of the by-law identifies the permitted uses for each Zone in the Township. The definitions in Section 3.0 can assist you if you are not sure of the nature of a use or how it has been defined for the purposes of this by-law. Words that are defined in Section 3.0 are italicized throughout the by-law. If a word is not italicized, it is not specifically defined. Uses that are not identified as permitted uses within a particular Zone are not permitted in that Zone.

### **4. Zone Standards**

Steps 1 and 2 have now identified the Zone in which your property is located and have identified what uses are permitted on your property. The next step is to determine what standards may apply to the uses on your property. Section 7.0 of the by-law identifies the Zone standards for each Zone in the Township. This section will provide standards for minimum lot area, minimum

frontage requirements, minimum yard requirements, maximum lot coverage for buildings, and the maximum permitted height of buildings.

## **5. General Provisions**

Now that you are aware of the uses permitted on your property and the specific Zone standards that apply to those uses, reference should be made to Section 4.0 of this by-law. Section 4.0 contains a more generic set of standards known as 'General Provisions' that apply to all properties in all Zones throughout the Township. For example, the general provisions contain standards that regulate the construction of accessory structures, height exceptions and non-conforming/non-complying uses that apply to all properties regardless of where in the Township a property is located.

## **6. Parking and Loading**

Section 5.0 provides the parking and loading requirements for all permitted uses in the Township. If you are considering changing the use of your property or adding a new use to your property, you should review Section 5.0 to ensure that you are aware of the parking requirements for the proposed use.

### **DESCRIPTION OF BY-LAW COMPONENTS**

This By-law contains nine sections that together, provide the standards applicable to all lands within the Township. These sections are as follows:

- Section 1 – Interpretation and Administration
- Section 2 – Establishment of Zones
- Section 3 – Definitions
- Section 4 – General Provisions
- Section 5 – Parking and Loading
- Section 6 – Permitted Uses
- Section 7 – Zone Standards
- Section 8 – Exceptions
- Section 9 – Enactment

The purpose of each of these sections is described below.

### **SECTION 1.0 – INTERPRETATION AND ADMINISTRATION**

This section of the By-law specifies:

- what lands are covered by the by-law;
- that every parcel of land in the area covered by the by-law is to conform and comply with the by-law; and,
- what penalties can be levied against a person or a corporation if they contravene any provision in the by-law.

## **SECTION 2.0 - ESTABLISHMENT OF ZONES**

This section establishes the Zones that apply to the lands covered by the by-law. This section also describes how to determine the location of the Zone boundaries on the schedules.

## **SECTION 3.0 - DEFINITIONS**

It is necessary to define words in a zoning by-law because it is a legal document. A by-law must be drafted so that it can be enforced in a Court of Law. These definitions will help provide clarity in the by-law and ensure that the by-law and its intent are applied consistently.

## **SECTION 4.0 - GENERAL PROVISIONS**

This section contains a number of regulations that apply to certain types of uses, buildings or structures regardless of where in the Township or in what Zone they are located.

## **SECTION 5.0 – PARKING AND LOADING**

Parking and loading facilities are required for almost all uses within the Township. This section provides the requirements for these facilities including such regulations as the number of spaces required for all uses, minimum driveway width, minimum *parking space* size and the location of parking facilities on a lot.

## **SECTION 6.0 - PERMITTED USES**

This section lists the uses that are permitted in each Zone. The effect of these Zones is to only permit certain uses in various parts of the Township. The only uses permitted in a Zone are those that are specified in the by-law. If a use is not specifically mentioned as a permitted use in a Zone then it is not permitted. Similarly, if a use is defined in Section 3.0 of the by-law but does not appear as a permitted use in any Zone, then it is not a use permitted by the by-law.

## **SECTION 7.0 - ZONE STANDARDS**

This section contains a number of regulations that control the placement, bulk and height of a building on a lot. This includes regulations such as minimum lot size, minimum frontage, maximum building height, setbacks from property lines or the maximum coverage of a building on a lot.

## **SECTION 8.0 – EXCEPTIONS**

This section contains regulations that are specific to one property or a group of properties in the Township. For example, the minimum front yard in a Zone is 8.0 metres. The required front yard may be reduced to a lesser number if deemed appropriate and the mechanism to accomplish this reduction is by amending the By-law and excepting the property from the general standard. Exceptions to this by-law are provided in a consolidated list in Section 8. Exceptions are denoted on the Zone Schedules by a hyphen as well as a number following the zone abbreviation (e.g. RU-1). The number is a reference to find the specific exception in Section 8.

## **SECTION 9.0 - ENACTMENT**

This section contains the signatures of the Mayor and the Clerk who signed the by-law when it was passed by Council in accordance with Section 34 of the Planning Act, R.S.O. 1990, c.P. 13.
